

## **STATEMENT OF PURPOSE**

I am Anandhakrishnan Murukan a sincere, enthusiastic and a dedicated person hailing from Kerala, India. I work hard for whatever little success that I have achieved on the path of my desired destination. My strength is confidence and the determination to do things to its fullest. My optimistic qualities have always helped me to attain my targets.

I have performed academically well. I have scored 6.6 in 10<sup>th</sup> grade and 70% in my 12<sup>th</sup> grade. I was encouraged to pursue commerce stream as I was inspired by my father who is a business man. My passion towards business grew when I witnessed his dedication towards work. I learnt determination and hard work from him. He always motivated me and showed me right way in my life. He knew my interest and encouraged me to study abroad. I had done my own research like attending education fairs and taking advice from my seniors and teachers. I finally came up with idea to pursue my higher studies in Canada. I found Centennial College as one of the best colleges, as it is the first community college in Ontario province. I was interested towards their Business courses, as the syllabus and structure of the courses are practical oriented and learnt with case studies. So as a part of their entrance requirement I gave IELTS and scored an overall band 7.0. Now, I hold an offer for Business administration in supply chain and operation management advanced diploma course. I trust this is an ideal course for my future.

In this advanced diploma program, I will learn about environments similar to real business settings. I will acquire the ability to apply the concepts, theory and practices of supply chain management in modern-day business enterprises, and appreciate the roles and responsibilities of various sub-functions and entities that are essential to organizational success. The co-op aspect of this program will provide me with hands-on experience. This experience not only allows me to put classroom learning into practice, but will also provide valuable contacts for my future careers.

Canada is a bilingual country, which makes studying excellent opportunity to develop our language skills and boost our prospects for an interesting career. It supports diversity and multiculturalism. It has a world-class education which is recognized around the world. The Canadian educational system encourages cross-disciplinary studies and the development of transferable skills (e.g., critical thinking, teamwork and communications). I hope to join for bachelors after my diploma. I am also convinced with work permit options provided by Canadian govt. to international students to gain international experience. Moreover, I strongly believe that the knowledge and communication skills which I will acquire during my study in

Canada will certainly help me to stand globally. I am utmost confident that when I reach my country with this skill and practice, I will be placed at a higher position. Also I aim to achieve my ambition to establish my own firm

As a part of my studies, I have already paid first installment fee of CAD 8000 \$ and transferred CAD 10,000 \$ to Scotia Bank, Canada to meet my living expense. Thus, I believe that this course would act as a platform for my entry to my life goal and help me cherish my dreams by converting them into realities. I humbly request you to grant me the necessary student visa and oblige
